

OneSource Intranet Accelerator for SharePoint

Intranet at the speed of business: faster, cheaper, better.

Executive summary

We live in an age of hyper-connectivity, a digital workplace and the 'always on' business. An age where being the first to know and the first to act is often the difference between success and failure.

You want an effective intranet so you can deliver to your team the most up-to-date information readily available, on any device, whether they are in the office, in front of customers, or on the go.

Micro Focus OneSource® Intranet Accelerator for SharePoint is a content management system (CMS) delivered as-a-service, which helps you unleash the power of Microsoft SharePoint®, one of the most popular corporate intranet platforms. It saves you time and money by eliminating the need for expensive SharePoint developers and empowering your business users and content owners to be up and running in days, publishing to and communicating with your users using an intuitive interface, ensuring they have access to the latest and greatest content.

OneSource has a very good search experience for all users, including a simple way to report missing content which is complimented by its thorough analytics dashboards for the site, pages, and engagement.

Intranets should be easy

A corporate intranet is a critical element of the digital workplace. It is how you communicate to your employees, publish content, and share news. It is how your teams collaborate, store documents, and share knowledge. In an age of information overload, a great intranet where you can quickly find what you need is perhaps the best productivity tool you could have.

SharePoint provides many of the features needed for a robust intranet. However, publishing content, creating, modifying and maintaining pages is time-consuming and requires technical skills that not many business users, content editors and publishers possess. This means that unless you hire expensive SharePoint developers, you will be slow to create and update content, your sites will stagnate, and productivity will decline because your users will be spending too much time searching for information that should be easy to find.

OneSource Intranet Accelerator for SharePoint addresses the existing cost and lead time challenges related to Intranet site management.

Features and capabilities

It is easy to deploy and requires no technical skills, enabling business users to rapidly create and easily maintain rich and engaging pages with a rich set of capabilities:

- Easy to use, intuitive, drag-and-drop interface, suitable for non-technical users
- Improved user experience vs. standard SharePoint UI
- Control, manage, and structure content in real time
- Full corporate brand compliance
- Responsive design catering for both mobile and web
- Built-in rich set of components: carousels, polls, quiz, news feeds, form, multimedia, social and many more
- Compliance with accessibility standards
- Advanced web analytics

OneSource has a valuable 'Management Hub' for the administration of the site that includes extensive training and support material.

It also has a consistent approach to making all aspects of the site easy to use for end users and admins.

Service overview

OneSource Intranet Accelerator for SharePoint is delivered as a service. It consists of the following components:

Pre-deployment setup

During this stage, we obtain from you the necessary branding elements to allow us to customize the deployment to comply with your branding guidelines.

Deployment

During this stage, we install the already-branded configuration onto your SharePoint environment. We then provide hands-on training to the content managers you nominate, and also provide you with our tutorial videos.

Post-deployment support

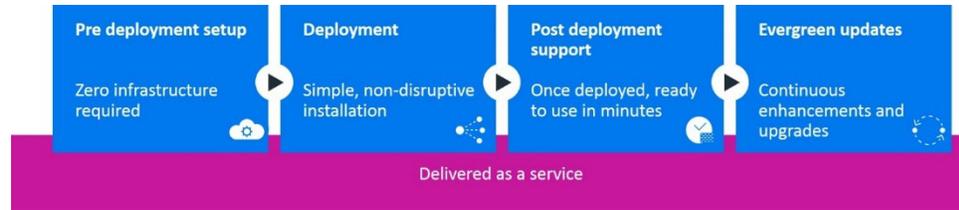

You are entitled to email and phone-based support for the duration of your contract. The number of hours per month that you are entitled to is dependent upon the amount of licenses purchased.

Evergreen updates

You are entitled to free updates for the duration of your contract.

“OneSource is amazing—super user-friendly and now I can have the ability to do the majority of our updates right here from my desk. It’s as easy to use as Word.”

Michelle Martin, Communications Lead,
EBC Marketing Team,
Hewlett Packard Enterprise

Unique Selling Points

- Puts both content creation and site creation in the hands of non-technical users, simplifying the Intranet whilst ensuring corporate branding standards are followed.
- Market-leading Search experience for Intranet users; important in ensuring that users can find as much relevant content as possible.
- Extremely versatile and flexible which significantly speeds up site creation; what can be done in minutes usually takes days without OneSource.
- A thorough set of Analytics capabilities allowing benchmarking of Key Performance Indicators such as visits, entry pages, downloads and many more.
- Valuable “Management Hub” to support Intranet management, with extensive training and support collateral freely available.
- Very cost effective, with an impressive ROI; OneSource can save 74% on Intranet support costs and deliver triple digit ROI.

The Micro Focus Professional Services difference

Micro Focus provides unmatched capabilities with a comprehensive set of consulting and implementation services and unique intellectual property that help you drive innovation through streamlined and efficient software delivery.

- Proven Micro Focus solution implementation expertise
